and the

14 years experience
and millions of feet of paver installations

have gone into the development of B.E.A.S.T.

14
YEARS

- Super strength
- Amazing straight lines
- Super flexibility
- Perfect curves
- Pavers never looked this good

8 feet long x 1.75 inches high
3 inches deep x 2.5 inches wide

Brickstop Corporation distributes paver edging around the world. 14 years in business has taught us a lot about paver edging and the most important things we've learned are that:

- You must use edging for a perfect, long-lasting finish.
- It has to be easy to use.
- You must have just one piece that does both straight lines and curves.
- It must withstand a wide temperature variance.
- It must use easy to find common nails.
- It must be designed to permit a lattice nailing pattern for strength and stability.
- It must have Structural Rib Re-enforcement SRR™ for perfect straight lines.
- It must have Stable Sure-gripping Footprint SSF™ for stability.
- It must allow natural vegetation growth.
- It must be backed up by a company with experience and staying power.
- Must have a B.E.A.S.T logo.
