

PAVERS

COMBINE ALL COLORS TO CREATE INTERESTING COMBINATIONS

PAVE THE WAY TO PERFECTION

These interlocking pavers are a simple and attractive way to highlight and protect many facets of your business, barn or home. They are 1 3/4" thick and are available in three solid colors: brick-red, green and black. The dog bone shape makes them easy to combine with multiple pavers to create an infinite array of shapes and walkway lengths. They provide anti fatigue protection because of their durable and resilient construction. These pavers are very beneficial to horses, cushioning their hooves.

Installation is a breeze. First determine the shape of the target area. Once your target shape is determined, an electric saw is all that is required to remove the excess around the edges of the design.
