

STALL KITS

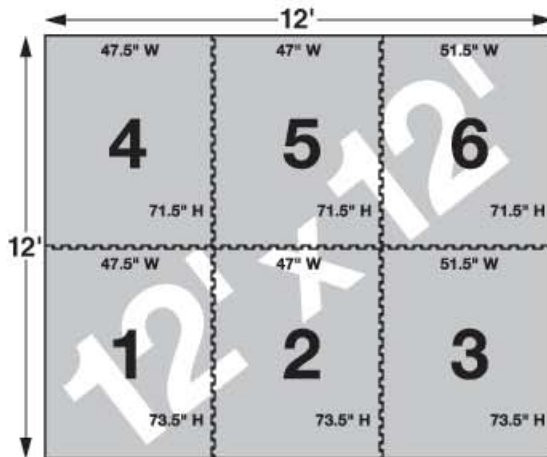

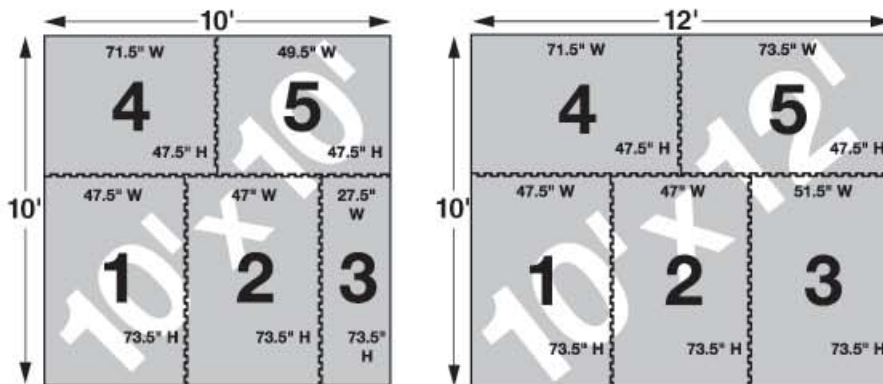

MATS INTERLOCK TO FORM A TIGHT FIT

GET IT TOGETHER

FLEXGARD® Stall Kits are a wonderful solution for those who desire a pre-cut rubber flooring product that lays cleanly and easily into your standard stall. All of them are constructed of the same durable FLEXGARD rubber as our other rubber mat products. Each piece of the Stall Kit is precision cut to create an interlocking edge. These edges connect to one another, forming a seal that cannot be taken apart from every day animal use. The seal is tight, preventing dangerous gaps from occurring in between them. Choose from three pre-cut sizes for your convenience.
