KRAIBURG Relastec GmbH

Kraiburg® SporTec® Rolled Flooring – The High Quality Surface

Kraiburg® SporTec® is a high quality, robust, durable surface developed for fitness centers, bodybuilding areas, gyms, and other high stress applications. Other applications include: stores, showrooms, exhibition areas, walkways, and entrance areas. SporTec® is made out of recycled rubber granules and EPDM granules in different colors which are bound together with a PU-bases binder. SporTec® is the only rolled rubber product that is available in 5' widths, which reduces the number of seams while enhancing the appearance of the floor.

SporTec® has an extremely high impact resistance and is long lasting against spikes, skates, and other aggressive sport shoes. Together with its sound reduction and elastic properties, as well as its warm feel, SporTec® is the ideal choice to protect both equipment and participants against injury.

Kraiburg® SporTec® Highlights:

Easy and Simple to Install

Moisture/Humidity Resistant

High Impact Resistance

Noise Reduction

Wide 5' Rolls for Less Seams

Wide Range of Colors

High Wear Resistance

Easy to Maintain
