

# FLEC-LOCK

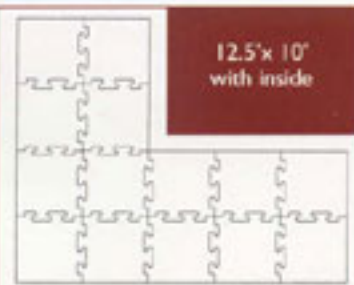

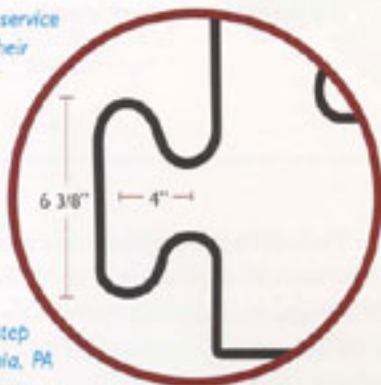

**Flec-Lock** is a step up from the standard black Mega-Lock. Flec-Lock uses the basic black mat and adds percentages of color according to your specifications. These colors include pearl, red, green and blue and can be combined with the black individually or in color combination groups in percentages of 10%, 15% or 20% color.

Combine Flec-Lock and Mega-Lock for a checkerboard or patterned appearance or use one or the other. Either way, your floor ends up the winner!

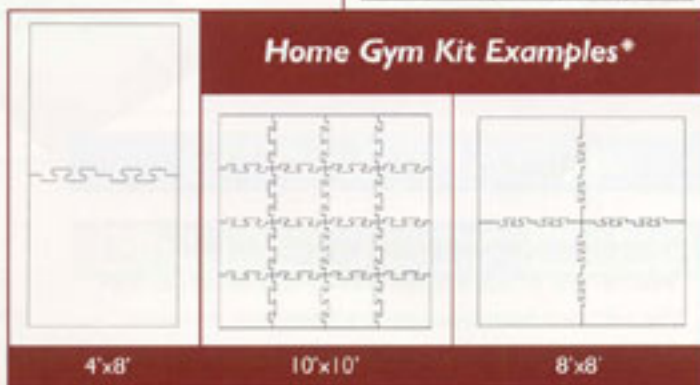

**Super Sized tabs!** In our design research, we found that smaller interlock tabs over time, easily pull apart and tear when stressed or pulled. We wanted to make certain that we could provide customers with a design that would stay put when it needed to stay put. Our interlocking mats feature a super sized tab that is a full  $6\frac{3}{8}$ " wide and 4" deep. It stays where you put it and does not come unlocked under heavy use.

"RB Rubber Products' service has been awesome! Their product, based on our research, is of the absolute best value and quality on the market. It lies flat, does not smell and is an excellent value for the dollar!"

David Bock, Stagestep

## Home Gym Kit Examples\*

\*Nearly any configuration available

- **Aesthetically Pleasing.** The mats are available in a variety of colors in percentages from 10-20% or completely black. The colored particles are homogeneously mixed throughout the entire product and have no chance of wearing away. The vibrant colors are perfect for dramatic interior solutions and exterior accents.
- **Factory Sheared Edges** assures a uniform and easy installation.
- **Safe for Indoor or Outdoor Uses.**
- **Easily Cleaned.** Indoor cleaning involves a broom, damp sponge mop or vacuum cleaner. For outdoor uses, a water hose, leaf blower or broom is sufficient. If desired, a mild detergent such as RB Cleaner can be used to sanitize the mats.
- **Designed to Provide** excellent traction... even when wet!
- **Manufactured Entirely in the USA.**
- **Manufactured of 100% Premium Recycled Rubber** (free from fillers or contaminants) and are re-recyclable.
