

# MEGA-LOCK

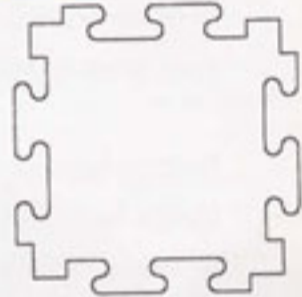

**Mega-Lock** is a solid black or natural black rubber mat available in a variety of interlocking pieces to meet any need. Made of the same heavy-duty material as our Athletic Mat, our state of the art cutting system provides a virtually seamless appearance.

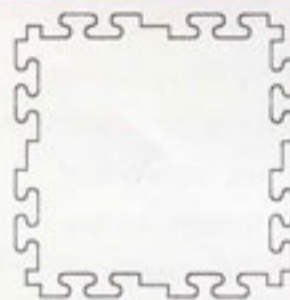

30"x30" edge

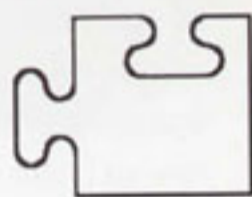

30"x30" corner

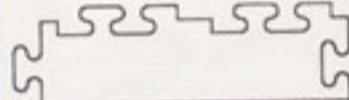

30"x30" center

45"x45"

12x12 corner

45"x12" side

## Institutional/Commercial Configuration Options

**Why is Mega-Lock and Flec-Lock different from other interlock mats?** When designing our interlock flooring, our primary concern was to create a superior flooring product that did not have the typical problems associated with interlocking floor systems. We designed Mega-Lock and Flec-Lock to provide an interlock mat so precisely cut that it appears seamless, large enough to not require adhesive but still be manageable, allow versatility in installation, and most importantly, look fantastic! Our customers tell us we succeeded.

**How strong are the tabs?** Some cutting systems use pressurized water that actually removes part of the mat leaving gaps between the seams. Other systems apply so much pressure during the process that it results in concave edges, making weak seams. Our state-of-the-art precision cutting process, used in the aerospace industry, slices through rubber without pressure or displacement resulting in an unbelievable, almost seamless interlock pattern that does not compromise the mat's strength.

*"We love the MEGA-LOCK flooring.... It is a real top-of-the-line product. We've received tremendous response on this flooring in the commercial market as well as residential usage. I've personally chosen it for my workout room at home."*

## Our Rubber Mats are:

- **Extremely Durable.** Made from premium recycled rubber particles and/or colored EPDM rubber pieces (highest quality colored rubber), each product is specifically designed and manufactured for durability.
- **Highly Resilient.** Anti-fatigue qualities found naturally in rubber are further enhanced by a space age polymer binder used during manufacturing. Each mat is fabricated from thousands of rubber granules and offers superior underfoot comfort and resilience to cushion the shock from running, exercising, walking, and standing.
