

# Recreational & Sports Surfacing Maintenance Products

**The TopCoat System is the fastest way to make a tired playground beautiful!**

The TopCoat System is a "Green" water base paint, designed for revitalizing and extending the life of rubberized playground and sports surfaces. Over time, pour-in-place surfacing, playground tiles and running tracks start to disintegrate, fade and lose their color. The TopCoat System can easily bring back the beauty and integrity of these surfaces.

This system consists of Primer, TopCoat and our exclusive Cool Touch Colorants. When applied as directed, tired rubber safety surfaces undergo a stunning visual transformation. As an added bonus, the Cool Touch Colorants work to dramatically reduce surface temperatures.

Sports and playground maintenance professionals love The TopCoat System for its durability and ease of installation. Just apply with an airless sprayer. Cleanup is quick with soap and water.

**Old & tired playground**

**Revitalize old and tired looking playgrounds in three steps! Nothing could be easier.**

**#1 Prime**

**#2 Paint**

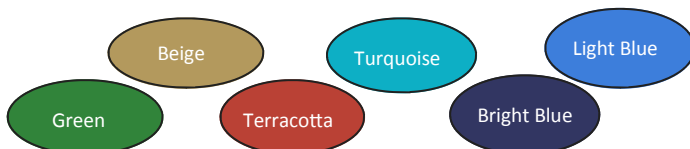

**#3 Play!!**

## CoolTouch Colorants

Cool Touch Colorants are an integral component of the TopCoat System. These sophisticated pigments are easily mixed with TopCoat at the job site, adding brilliant colors to faded rubberized playground and sports surfacing. Cool Touch Colorants help reduce surface temperatures on pour-in-place surfacing (PIP), rubber tiles, running tracks and other rubberized surfaces by reflecting the sun's infrared light waves. The higher the solar reflectance, the cooler the surface will stay.

Stone River's Cool Touch Colorants IRR reflective technology works to maximize total solar reflectance, reducing solar gain by as much as 22%.

## PIP Patch

Rubberized playground surfaces and running tracks sometimes need a quick repair. PIP Patch is a convenient repair kit that contains pre-measured amounts of recycled rubber granules and binder. This product also works great for creating custom transitions and curbs. Just Mix & Patch.
