

RubberFlex Swing Mats

Diamond Safety Concepts
A Revolution in Floor Safety

Product Description

RubberFlex Swing Mats are recommended for use in conjunction with any loose fill playground surfacing where loose fill surfacing gets kicked out or displaced under the swing or in high traffic areas.

RubberFlex Swing Mats enhance safety and help to keep our rubber mulch from being pushed away from below the swings.

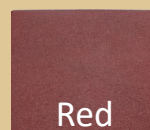

Our swing mats weigh about 100 and 122 lbs., which helps to make them vandal safe, and also gives them the needed stability for aggressive and high traffic play areas. The beveled edge prevents tripping and allows the mats to be buried either partially or completely without presenting a hazard.

RubberFlex Swing Mats are a must when safety is a priority.

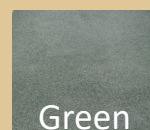

Basic Specification

DSC Swing Safe Mats are available in two different sizes to fit your every need.:

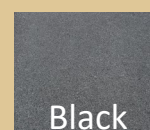

- 3' x 5' x 1 3/4"
- 3' x 5' x 2 1/4"
