

**Not Every Floor Looks Great  
After Dropping A Few Pounds.**

**MITCHELL**  
RUBBER PRODUCTS, INC.

# More Than Just Another Pretty Face.

It takes a tough floor to take on today's gyms and fitness centers. The repeated abuse of weight equipment, and everything else we throw at it on a daily basis, can surely leave an already wimpy-looking floor appear down right weak. Mitchell Rubber has again designed a rubber floor tile, DIAMOND PLATE, that will hold up through countless workouts and still look good.

These 4' x 4' tiles are engineered with the same state-of-the-art technology as our 2' x 2' inter-locking tiles. The polished diamond pattern contrasts with the textured, granite-like tread area to coordinate beautifully with your other high-tech equipment.

## TRIED AND TRUE

We've been creating rubber flooring for over 35 years, so we truly know what it takes to give you the BEST FLOORING for your demanding environment. Our flooring is a solid density of high quality rubber materials, not made from recycled rubber particles. We design and build our products with the intention and commitment to last. The Diamond Plate has color completely through, not just laminated on the surface for aesthetic purposes. So the only things getting shredded in your free weight area are your customers, not your floor. Thus, we truly do give you the BEST investment cost for your gym or fitness center.

## MINIMAL EFFORT - MAXIMUM RESULTS

We understand the importance of giving you a rubber floor that is as close to maintenance-free as possible. The Diamond Plate tiles are designed to be cleaned easily with a broom or slightly damp mop. In keeping with aesthetics, we have engineered the diamond edge pattern so that it will give you a monolithic appearance. Plus, we compress/manufacture the product to be dense, so the 4' x 4' tiles will stay where you put them. Thus, there is no need to use any adhesive to hold them in place or keep the edges from curling up.

Diamond Plate Tile. Another quality rubber floor from Mitchell Rubber that not only looks great, but is tough enough to last!

Diamond pattern tiles mesh seamlessly.

Tough enough to out-last countless workouts.

Choose from these popular colors.
