KEEP IT LITE

These lightweight mats are made of high density, durable, closed-cell EVA (Ethylene Vinyl Acetate) foam. They interlock on all 4 sides, providing fast and simple installation. These mats are slightly textured, promoting a safe and slip-resistant surface. EVA mats are often used by some of the largest health clubs and fitness gyms in America. Create a clean, quiet, and soft workout area for any floor. Tru-lite™ can also be used as portable stall mats, providing safety and comfort for your horse.
