

Accessories

SofSURFACES offers the widest selection of accessories to meet the specific needs of your project.

Vesatile Solutions

When designing the perimeter finish of a SofTILE installation, the preferred option is to pour a concrete curb based on the exact SofTILE height and site dimension. When pouring a concrete curb is not an option, SofSURFACES has designed a wide selection of accessories to meet the various edge-treatment challenges. View the accessories below and learn more about their specific application.

Inside Corner

Specifications:
Length: Custom
Width: Custom
Height: Custom
Weight: Custom

Applications:
Inside corner pieces are used in conjunction with both SofRAMP Jr. and SofRAMP ADA edge pieces to help facilitate irregular shaped perimeters.

Outside Corner

Specifications:
Length: Custom
Width: Custom
Height: Custom
Weight: Custom

Applications:
Outside corner pieces are used in conjunction with both SofRAMP Jr. and SofRAMP ADA edge pieces to help facilitate irregular shaped perimeters.

SofRamp Jr.

Specifications:
Length: 48"
Width: 7" - 16"
Height: 1.75" - 5.00"
Weight: 13 - 46 lbs

Applications:
Our SofRAMP Jr. is used as a perimeter edge treatment for above grade installations to create a smooth transition from the adjacent grade onto the SofTILE surface. Use of the SofRAMP Jr. ramp piece is required to reduce trip hazards and provide a fixed border when alternate retaining edges, such as concrete, are not utilized.

SofRamp ADA

Specifications:
Length: 48"
Width: 25.75" - 81"
Height: 1.75"-5.00"
Weight: 41.75 - 231.75 lbs

Applications:
SofRAMP ADA has been designed with the necessary slope to provide compliance with ADA standards.

SofRAMP ADA is used in conjunction with above grade installations to achieve a wheelchair accessible route onto the

surface. Our ADA ramp is typically used in a single location or select locations around the perimeter, in conjunction with our SofRAMP Jr.

SofRAMP ADA is supplied as a one, two or three-piece solution for ease of installation, and can be placed outside of the SofTILE perimeter or inset into the tile field when space is limited.

T-Strip

Specifications:

Length: 47.5"

Width: 5.75"

Height: 1.75"

Weight: 6.6 lbs

Color: Available in black only

Applications:

Any change in elevation between a newly installed SofTILE surface and an existing border or sidewalk can be unsightly and create a trip hazard. Our T-Strip edge piece provides a solution by creating a smooth and neat transition between elevation changes of up to half an inch.
