### **Maintenance Instructions**

Mitchell Rubber Products would like to thank you for purchasing our interlocking Best Flex – Diamond Plate gymnasium tiles. These products are manufactured using a vulcanized virgin rubber which provides extreme strength and ware resistance. This material is non porous and is easily cleaned with a damped mop or sponge with a light soap solution. We recommend that you do not use an excise amount of water, as you do not want the water to flow in between the tiles.

If the flooring is soiled with grease or any sticky material we recommend a product named Simple Green. This solution should be applied with a sponge or a cloth directly to the contaminated area. Simple Green can be found at virtually any home supply outlet.

If you have any further questions or we can help you in any way please do not hesitate to contact Jackie Soto or Mike Mitchell.
